

## Deep Valley Birth Collective Membership Application

All Deep Valley Birth Collective members must affirm the following statements:

- Birth is a normal, natural and healthy process (CIMS).
- World Health Organization recommends cesarean section rates to be no higher than 10-15% of all deliveries.
- Availability of vaginal birth after a C-section (VBAC) for all women. If you are a midwife or a medical provider, you will accept women with prior cesareans into your care during pregnancy and birth. If you are a childbirth educator or a doula, you will affirm that VBAC is a safe option for most women, and you will help them find providers who will support them.
- If complications arise during pregnancy, birth, or the postpartum period, medical treatments should be evidence-based. (CIMS)
- World Health Organization recommends exclusive breastfeeding up to 6 months of age, with continued breastfeeding along with appropriate complementary foods up to two years of age and beyond.
- Out-of-hospital birth is appropriate and safe for most women, and should be available to those who desire it.
